PROFILE

I'm a MERN Stack Developer who enjoys building web applications that are fast, easy to use, and reliable. I work with React, Next.js, Node.js, and MongoDB to build everything from websites to full business platforms, and I make sure they're secure and easy to maintain. I've worked on real projects for schools, restaurants, and companies, handling both the design and the backend. I like turning ideas into simple, working products.
